

Turf Pros Lawn Care-Organic

At Turf Pros Lawn Care, we wanted to make sure we offered an organic, natural lawn care program for those who are trying to avoid chemical solutions. That's why we created an organic version of our popular lawn care services. Our organic lawn care service is chemical free, which means we avoid the use of herbicides (weed killers) that contain chemical agents.

What's Included in Our Organic Program

Application 1: (Wake-Up Fertilizer) We treat your lawn with a controlled release organic granular fertilizer.

Application 2: This treatment consists of a controlled release organic fertilizer application with iron.

Application 3-4: This treatment consists of a controlled release organic fertilizer application along with **Grub Control**.

Application 5: This a non-burning slow release granular organic fertilizer. This promotes recovery from the stresses of summer and returns your lawn to a **Thick and Greener Turf**. *

Application 6: (Winter) This granular organic fertilizer application helps prepare your lawn for winter dormancy. This will also provide nitrogen to your lawn in the Spring to help with new growth.

Application 7: Hi-Cal Lime & Gypsum: This powerful product quickly enhances the soil environment, facilitating the biological processes that supports and promotes plant growth and improved health of the plant.

Please note: Anyone with the Organic Program is not eligible to receive service calls for weeds. This program is not conducive for weed control as it is 100% organic based.
